1. On a comfortable length of thread, pick up 1 half moon, 1C x8 times and pick up 2 A beads. Tie a knot to make a circle of beads. Go through all the beads again and exit the last two A beads. Make sure that all the half moons have the round side up as you add them, by going through the same hole each time. It helps to lay them out in advance.

2. Pick up 2 C beads and go through the outer hole of the half moon bead. Pick up 1C and 1A and go through the next half moon. \*Pick up 1 crystal and go through next half moon\*. Repeat 4 more times. Pick up 1A and 1C and go through the last half moon. Pick up 2C and pass through the center A beads and go through the next beads exiting the second half moon bead (in front of the crystal).

3. \*Pick up 1C, 3B, 1C\* and go through the next half moon. Repeat one more time. Pick up 2B, 1A, Spacer bead, teardrop, spacer bead, 1B, and go back up through the spacer bead, teardrop, spacer and A bead. Pick up 2B and go through the next half moon. Pick up 1C, 3B, 1C and go through the next half moon. Repeat one more time and go through the next half moon. Pick up 1A and 1C and go through the last half moon. Step up through the next 6 beads.

4. Pick up 3B, 1A, 4C and go back through the A bead just added. Pick up 3B and go through the next 2B,2A,2B. Tie the thread securely and cut. Add earwires.
